TECH-MED SILVER NITRATE APPLICATORS

75% silver nitrate, 25% potassium nitrate. Unique plastic applicator adds flexibility. Automated production provides consistent silver nitrate on applicator. Packaged in secure vial to insure moisture control. Five year shelf life.

4100 Silver Nitrate Applicators, 6", 100/vl, 10 vl/bx

BIRCHWOOD CYTETTE® ENDO CERVICAL SAMPLING BRUSH

Cytette® endocervical sampling brushes have a tapered head that simplifies introduction into stenotic cervices. Soft nylon bristles increase cellular yield and improve specimen quality. 7" serrated handle rotates easily, even while wearing gloves and is marked with a blue rotation indicator to ensure precise sampling. Handle is strong and flexible yet can be snapped at any point so the brush head can be returned to a lab for special processing. Cytette dispensers contain 100 endocervical brushes. An optimal Pap specimen requires the use of both endocervical brushes and ectocervical spatulas.

TRIAD ENEMAS

Design most used by caregivers and patients. The squeeze bottle design makes it easy to control and is free standing. The length of enema shaft is designed with safety in mind. Even when inserted to its fullest length, the tip is not in a position to perforate or abrade the sigmoid colon of a healthy adult. No deeper penetration is any more effective, and a longer shaft risks damaging the lining of the lower bowel. Equipped with an anti-reflex flutter valve to prevent back flush. Latex free and uses a water-soluble lubricant on tip for easy clean up and patient comfort.

- 10-2111 Sodium Phosphates Enema, 48/cs
- 10-2112 Sodium Phosphates Enema, Bulk, 48/cs
