**HARTMANN-CONCO FLEX-BAND® FABRIC ADHESIVE BANDAGES**

Ideal for dressing minor injuries and as a bandage for sensitive skin. Made with a hypoallergenic adhesive. Offers widthway strength for maximum conformability and flexibility. The full adhesive coverage around the wound pad firmly secures the bandage and provides a protective seal. Firmly adheres to the skin, yet can be removed painlessly without leaving sticky residue. Round-beveled edges that prevent premature lifting or peeling of the bandage. Hypoallergenic fabric that is flexible and conforms to any contour. Absorbent wound pad that will not stick to wound. Water-repellant layer that protects against moisture penetration. Latex free.

- 5551 3" x 3" Non-Adhering Sterile Dressing, 12/bx, 24 bx/cs

**ALBA PERMEABLE NON-ADHERING DRESSINGS**

Sterile. Made of a permeable knitted fabric that allows wound drainage to flow freely into the absorbent dressing. This helps keep the wetness from the wound, which minimizes maceration and helps promote healing. White petrolatum lines the dressing, providing a comfortable non-adherence to the wound - even during dressing changes. Ideal for draining surgical wound, open ulcers, abrasions, burns and other uses. The sterile clear film packaging offers a unique stay-flat feature when peeled open.

- 220 3" x 3" Non-Adhering Dressing, Single, 50/bx, 6 bx/cs

**ALBA STERILE PETROLATUM GAUZE DRESSINGS**

Clings and conforms to all body contours without sticking to wound. Provides soothing non-adherent protection with more convenience and less mess. Non-toxic, non-sensitive and non-irritating. An oil-resistant paper wrap folded over the dressing protects it within the peel-open foil-lined pouch and greatly simplifies handling. The dressing is easily taken out of its package without sticking or pad distortion. The folded edges of the inner wrap pull neatly away from the dressing with minimum adherence. The dressings are useful as an initial layer in surgical dressings and on skin graft sites, for soothing treatment of first degree burns and abrasions, and as wound packing.

An oil-resistant paper wrap folded over the dressing protects it within the peel-open foil-lined pouch and greatly simplifies handling. Whether using forceps or gloved hands, the dressing is easily taken out of its package without sticking or pad distortion. The folded edges of the inner wrap pull neatly away from the dressing with minimum adherence. The dressings are useful as an initial layer in surgical dressings and on skin graft sites, for soothing treatment of first degree burns and abrasions, and as wound packing.

**SHIPPERT 30 SECOND RHINO ROCKET® NASAL PACK**

The compressed foam is in a plastic syringe to protect it from moisture and to aid in insertion. When in place and in contact with moisture, the material swells to 6 times its compressed diameter. The Rhino Rocket is mainly designed for mucosal compression after nasal surgery or for tamponade of anterior or middle segment epistaxis. Unique applicator minimizes blood containment concerns. The X-Large Rhino Rocket and Super Pak are designed for posterior bleeds. The Rhino Rocket is a compressed medical grade sponge that is designed to give gentle but firm compression to the nasal mucosa.

**J&J SURGIPAD™ COMBINE DRESSING**

Multi-layer abdominal pad that helps provide protection and padding for major surgical wounds, while maximizing absorbency, wicking and dispersal of wound exudate. Sealed on all four sides. Green indicator line on back side for placement away from the wound. Sterile.

- 5511 5" x 9" Sterile Combine Dressings, 12/bx, 24 bx/cs

**KENDALL TENDERSORB WET PRUF ABDOMINAL PADS**

Consists of three key layers: soft outer nonwoven layer, fluff filler to absorb and disperse fluid and wet-proof moisture barrier to retard fluid strike-through. Unique wet-proof moisture barrier helps minimize exposure to blood-borne pathogens. Absorbs more fluid than ordinary ABD pads for fewer dressing changes. All four edges sealed to prevent lint residue and leaking.

**SOUTHWEST ELASTO-GEL™ COMFORT-AID™ GEL BREAST PADS**

A high glycerine content gel padding designed to help reduce nipple discomfort, improve nipple skin condition and for the management of breast and nipple injury. Unlike other hydrogel sheets and pads, Comfort-Aid™ contains 65% glycerine, 17% water and 17% polyacrylamide. Due to the high concentration of glycerine, the product exhibits bacteriostatic properties. Being bacteriostatic, the product will reduce the growth of bacteria, thus keeping the open cracks from becoming infected. With the low water content, the skin will be protected against maceration. Glycerine is a natural humectant that maintains moisture level to the skin. In addition, Comfort-Aid™ provides and maintains a moist, clean environment, is easy to use and comfortable to wear.

**SMITH & NEPHEW ALGISITE™ M CALCIUM ALGINATE DRESSING**

Made of fast-gelling, high mannuronic acid fibers from calcium alginate, which is extracted and purified from a natural, renewable source - seaweed. When exudate comes into contact with the dressing, it forms a hydrophilic gel that remains in intimate contact with the wound surface, helping to create and maintain a moist wound environment.

- 59480100 2" x 2" Calcium Alginate Dressing, 10/pkg, 10 pkg/cs
- 59480200 4" x 4" Calcium Alginate Dressing, 10/pkg, 10 pkg/cs

- 59480400 3/4" x 12" Calcium Alginate Dressing, 10/pkg, 6 pkg/cs

**SMITH & NEPHEW ALLEVYN™ ADHESIVE DRESSINGS**

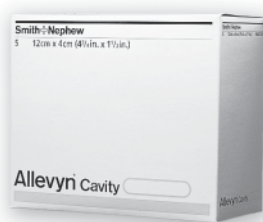

Sticks and remains in place, even on difficult-to-dress areas of the body. It may absorb up to four times more exudate than hydrocolloids and is ideal for moderately to heavily exuding wounds. The unique porous wound contact layer allows absorption and gaseous exchange. Will not stick to the wound surface or irritate periwound skin. Waterproof and aids in the prevention of bacterial contamination.

- 66020043 3" x 3" Adhesive Dressing, 10/pkg, 4 pkg/cs
- 66020044 5" x 5" Adhesive Dressing, 10/pkg, 4 pkg/cs

**SMITH & NEPHEW ALLEVYN ADHESIVE SACRUM**

Adhesive sacrum has been designed for a superior anatomical fit on the sacral area to provide enhanced pressure sore management combined with the proven benefits of Allevyn adhesive. Features: shaped to fit sacral area, low allergy adhesive, tapered constructin and micro-thin edges, unique trilaminar construction, perforated wound contact layer, highly absorbent central hydrocellular layer, and waterproof outer film layer.

- 66000451 9" x 9", 10/bx, 8 bx/cs

**SMITH & NEPHEW ALLEVYN™ CAVITY WOUND DRESSINGS**

Comprised of highly absorbent hydrocellular foam chips covered with a non-adherent wound contact layer. Designed to be pressed loosely into the wound cavity. Exudate is absorbed, yet no fibers or residue remain in the wound. A moist wound environment is maintained and the dressing is very comfortable in the wound.

- 66027326 2" Circular (3g) Wound Dressing, 10/pkg, 6 pkg/cs
- 66027327 4" Circular (17g) Wound Dressing, 5/pkg, 4 pkg/cs

- 66007630 Heel Dressing, 5/pkg, 6 pkg/cs

**SMITH & NEPHEW ALLEVYN™ HYDROCELLULAR FOAM DRESSINGS**

A trilaminar structure comprised of a non-adherent wound contact layer, a highly absorbent central layer and an outer layer that is waterproof and aids in the prevention of bacterial contamination. This structure produces a moist wound environment for those wounds that have traditionally proved difficult to treat because the exudate is hard to manage. Very absorbent and can usually be left in place for up to three to four days.

- 66020093 6" x 6" Foam Dressing, 10/pkg, 3 pkg/cs
- 66027643 2" x 2" Foam Dressing, 10/pkg, 6 pkg/cs

- 66927638 8" x 8" Foam Dressing, 10/pkg, 2 pkg/cs

**SMITH & NEPHEW ALLEVYN™ ISLAND DRESSINGS**

Features superior absorption allowing for longer wear time, with the convenience of one-hand application. Waterproof and aids in the prevention of bacterial contamination. It allows for passage of water vapor, oxygen and other gases. Non-adherent wound contact layer will not stick to the wound or sensitive periwound area. The hydrophilic absorbent layer cushions delicate tissue.

- 59764400 4" x 4" Island Dressing, 5/pkg, 10 pkg/cs
- 59764500 5" x 5" Island Dressing, 5/pkg, 10 pkg/cs

## SMITH & NEPHEW PROFORE™ FOUR LAYER BANDAGING SYSTEM

Comprised of a wound contact layer and four bandages, has been specifically designed for the management of venous leg ulcers. Designed to maintain effective levels of compression after application. May be left in place for up to one week. More frequent changes may be necessary especially in the first few weeks of management when the ulcers may be draining heavily. Contains everything necessary for the application of graduated compression therapy. May reduce preparation time, simplifies stock control and ensures the correct components are always available.

## SMITH & NEPHEW PROFORE™ LITE MULTI-LAYER COMPRESSION BANDAGE SYSTEM

Comprised of a wound contact layer and three bandages. Specially developed for the management of mixed aetiology leg ulcers where assessment has identified that the patient has some degree of arterial impairment which prevents the use of full compression. Designed to maintain effective levels of compression after application. The system may be left in place for up to one week.

## SMITH & NEPHEW PROFORE™ WOUND CONTACT LAYER

Allows exudate to pass freely to an absorptive dressing or bandage layer, thereby preventing exudate pooling and the possibility of maceration. Assists in preventing wound trauma during removal. The contact layer protects the wound from absorbent pad materials, while the natural viscose rayon monofilament produces no lint or breakdown residues to complicate wound cleansing.

**CARRINGTON CARRASMART™ FILM DRESSING**

Has the unique ability to allow selective evaporation of drainage through the film; thus it may be used as a primary or secondary dressing over wounds with higher exudate levels. This evaporation is called high moisture vapor transfer rate (MVTR). BioActive adhesive for gentle adhesion. High MVTR allows use on wounds with higher levels of exudate, decreases frequency of dressing changes and assists in preventing maceration under the film.

**J&J NU-DERM™ HYDROCOLLOID WOUND DRESSING**

Sterile dressings designed to promote a moist wound environment encouraging natural debridement and enabling granulation under optimal conditions. The dressing material interacts with wound exudate to form a soft gel. The matrix formulation of the hydrocolloid allows it to be removed with the dressing, with little or no damage to newly formed tissue. Features include low-friction backing, patented tapered edges, low profile tray design, skin-friendly adhesive, semi-transparent, patented center-hinge design sacral dressing and patented heel/elbow dressing design.

**HARTMANN-CONCO FLEXICOL HYDROCOLLOID DRESSING**

Folds easily making difficult-to-dress areas a snap. Peel off tabs and a thin beveled edge make application quick and prevent dressing roll-up. Handles wound drainage with a combination of absorption and evaporation - making it ideal for treating chronic and acute wounds. Stays secure days after it's first applied so re-application or securing with tape is eliminated. Thin film exterior and moist core allow for higher and quicker fluid uptake - leaving virtually no residue in the wound. Does not contain latex in the product or packaging.

### CARRINGTON CARRASORB™ H CALCIUM ALGINATE WOUND DRESSING

A non-woven, preservative-free, non-toxic, absorptive dressing manufactured from seaweed. It is a topical wound dressing for highly exuding wounds such as pressure ulcers, arterial and venous ulcers, diabetic ulcers, donor sites and traumatic wounds. When the calcium alginate comes in contact with the sodium-rich wound exudate, it forms a soft gel by exchanging the calcium bound to the alginate with the sodium from the exudate. It is a highly conformable, sterile, primary wound dressing intended to provide an environment suited for the management of moderate to heavily exuding partial to full thickness wounds, wounds with undermining or sinus tracts and wounds with necrotic tissue.

**WESTERN MEDICAL SILVERLON® ANTIMICROBIAL WOUND CONTACT DRESSING**

Designed to be placed directly on the wound surface to reduce the potential disruption of the healing tissue during routine outer dressing changes. Sterile and non-adherent to the skin. Has demonstrated antibacterial and antifungal properties on forty species tested to date. Healing time for all wound types has been significantly reduced by as much as fifty percent. By controlling the edema and soft tissue reaction the resultant scarring at the wound site is significantly reduced. Applied to patients with stage I-IV dermal venous ulcers up to seven days, depending on exudates, dressing is periodically inspected, washed in a sink with clean water and reapplied with new tape and absorbent padding. For extended use, it is important to keep dressing as clean as possible.

**SOUTHWEST ELASTO-GEL™ PLUS WOUND DRESSING**

An occlusive hydrogel sheet dressing with Sta-Fix tape included in the dressing pouch. The tape is included for added convenience when a water resistant tape is required to attach the dressing to the wound site. The Sta-Fix tape is a non-woven, polyester base tape with an open structure and coated with adhesive by a special process to produce a highly porous, breathable tape. The use of Sta-Fix tape allows the dressing to be adhered to difficult and complex contours. Utilizes a high concentration of glycerine (65%) as a water soluble humectant in a mixture of water and polymer matrix.

- DR8050 4" x 4" Wound Dressing w/tape, 5/bx
- DR8250 2" x 3" Wound Dressing w/tape, 5/bx

### SOUTHWEST ELASTO-GEL™ TOE-AID

A sterile, bacteriostatic, absorbent hydrogel dressing attached to a unique “T” shaped border adhesive of our Sta-Fix tape. The Elasto-Gel™ pad has been shown to prevent and control the formation of slough, debris, necrotic tissue and eschar at the wound site. This high glycerine pad will not dry out and will not stick to or dissolve into the wound. The pad absorbs excess exudate and helps preserve and maintain a clean, moist, infection-free wound bed. When used as a post-operative dressing after toenail removal, Toe-Aid helps reduce the frequency of dressing changes, negates daily soaks, nearly eliminates pain and helps assure a positive clinical outcome. The water resistant border adhesive helps assure a secure placement.

- 449600 3 oz. Tube Wound Gel, 12/cs
- 449700 7 oz. Pushbutton Applicator Wound Gel, 6/cs

**SOUTHWEST GOLDDUST™ HYDROGEL WOUND FILLER**

A high absorbent hydrophilic polymer capable to absorbing large amounts of exudate and retaining the exudate in the matrix even under high pressure. May be used as dry granules on highly exuding wounds, but must be monitored for the potential of over-drying the tissue.

- DR9300 GoldDust Super Absorbent Wound Filler, 3 grams, 10/bx

**SOUTHWEST STIMULEN™ ENHANCED COLLAGEN WOUNDCARE-LOTION**

A thixotropic liquid that will form a gel when kept undisturbed for several hours at temperatures below 72°F (21°C). It becomes liquid immediately with agitation, at slightly higher temperatures or when applied to the skin. It is designed to moisturize and condition the skin. It may improve skin problems, such as: skin rash or irritation caused by various diseases or exposure to various chemicals, soaps and detergents, microbes, or other common problems - dry hands, feet and elbows, athletes foot, jock itch, etc. It may be used to soften the skin that may be causing wrinkles, callous and corns. May be effective for improving scar remodeling.

**HARTMANN-CONCO CO-WRAP® SELF-ADHERENT SECURING WRAP**

A unique blend of cotton and polymer fibers that adheres securely to itself - not skin, hair or clothing. Its special construction also makes it porous so it's cool and comfortable to wear no matter how long it's worn. An easy-to-use, high-performance bandage. Versatile and is effective even where sensitive tissue or wet environments are a consideration. Ideal as a secondary or securing bandage and for overwrapping primary dressings. Unlike bandages that require clips, tapes or pins, it won't shift and slide. CAUTION: This product contains natural rubber latex which may cause allergic reactions.

**HARTMANN-CONCO FOURPRESS™ COMPRESSION BANDAGING SYSTEM**

Used to effectively manage venous leg ulcers and related conditions. Composed of four bandages that work together. Provides effective sustained compression for up to seven days when applied as directed. Layer One is a non-woven padding composed of a blend of synthetic materials that absorbs wound exudate. This highly comfortable layer primarily provides protection to bony prominences. Layer Two is a crepe bandage which anchors and smoothes the padding layer while absorbing exudate. Layer Three is a light compression bandage that conforms to any contour while providing about one half the compression of the system. Layer Four is a latex free cohesive bandage that sticks to itself and secures the bandages without tape for week-long compression.

43400000 4" Compression Bandaging System, 8 kits/cs

**HARTMANN-CONCO MEDI-RIP® SELF-ADHERENT BANDAGE**

Self-adherent elastic support and compression bandage. Woven of 99% cotton yarn, it is porous, lightweight and cool. Sticks to itself, but not to skin or hair; no adhesive residue. Conforms readily to body contours for ease of application and maximum comfort. Can be torn easily to exact length needed. CAUTION: This product contains natural rubber latex which may cause allergic reactions.

**NUTRAMAX SEAL-ON™ STOPS BLEEDING SPRAY POWDER**

This spray is used to stop capillary bleeding from minor cuts, grazes and surface wounds. On application the spray quickly dries to a fine white powder which on contact with the blood absorbs it and forms a soft artificial clot stopping the bleeding quickly. Hypoallergenic and pH balanced. Safe for use on both adults and children. Does not need to be removed from the wound and reduces the risk of renewed bleeding.

**CHESTER PROFESSIONAL SYSTEM 1200**

Chester's Manual Dispenser System features a unique 3MP-pump consisting of only three moving parts that gives a precise dosage of 1 ml. The design is maintenance free and dispenses an entire line of antiseptic gels, soaps, and lotions. The 3MP-pump works with absolutely no drip or back suction, emptying the container completely. The 1200 ml bottle and pump features a completely closed system. This unique pump system is on each and every bottle of soap, providing a new pump-valve with every refill bottle. The dispenser itself is a simple and attractive 2-part design with no moving metal parts or latex components. The cover is available in red, white and yellow. Special orders can be produced in a variety of styles and colors with logos and graphics. The ABS cover serves as the push bar and is the only moving part on the dispenser. The cover has no corners, edges or rough surfaces, which makes the exterior easy to clean. This dispenser has an excellent space to volume relationship. It fits into smaller spaces than 800ml units and offers up to 50% more volume. Easy to load; simply open the dispenser cover, remove the empty bottle, replace it with a new bottle and the system is ready to go. Tamper resistant; each bottle of soap is sealed and the nozzle cannot be removed.
