**MALLINCKRODT BRONCHO-CATH®
ENDOBONCHIAL TUBE**

Double lumen design permits an airtight seal of the trachea and one bronchus. Color-coded cuff, pilot balloons, and proximal lumens help identify bronchial and tracheal lumens. Supplied with stylet in place to help tube maintain shape for easier intubation. Packaged with two double swivel connectors, suction ports, Carlens tube adapter and two extra-long suction catheters. Smooth transition inner lumens allow easy passage of bronchoscopes. Standard features: high-volume low-pressure cuff, atraumatic molded tip, radiopaque marker, pilot balloons with mechanical self-sealing valve. Large ventilatory lumens feature small O.D. Bronchial tip modification simplify intubation and help prevent bronchial tip occlusion.

KENDALL-LTP DEVON HANDS FREE TRANSFER MAGNETIC DRAPES

Disposable magnetic drapes are specifically designed to attract and hold surgical instruments on the sterile field. Minimizes risk of percutaneous injuries and provides safe, effective instrument transfer in the OR. Flexible drapes conform to any shape with non-slip foam backing for secure positioning. Raised magnets provide strong holding power while allowing instruments to be easily grasped. Drapes with patented "stays" can be shaped to form a "safety trough" along the edges. Neutral Zone magnetic drapes have a convenient, built-in, non-magnetic area to hold or safely transfer sharp instruments. Kidney shape basin and rectangular tray easily attach to magnetic drapes.

KENDALL CURITY THORACENTESIS TRAYS WITH SAFETY COMPONENTS

Fully automatic two-way valve requires only simple pulling and pushing of the syringe plunger for automatic withdrawal and diversion of pleural fluid, eliminating the necessity for constant manipulation. Aspirating needle is equipped with a unique depth clamp that adjusts easily to the desired level of insertion and then locks into place, reducing the risk of over-penetration of the needle into the chest cavity. Once assembled, the closed system allows pleural fluid to be aspirated, and collected with reduced risk of external contamination. Sterile Contents; Prep Tray: (1) Underpad, (1) Prepping Applicator Sponge, (1) Removable Prep Tray; Procedure Tray: (3) 12-Ply 3" x 3" Gauze Sponges, (1) 5ml Lidocaine HCl Injection USP 1%, (1) 25ga x 5/8" MONOJECT MAGELLAN Safety Needle, (1) 21ga x 1 1/2" MONOJECT MAGELLAN Safety Needle, (1) Plastic Syringe, 5cc Luer Slip, (1) Plastic Syringe, 50cc Luer Lock, (1) Two-Way Control Valve Assembly, (3) 8cc Specimen Vials & Caps, (1) Collection Bag, 1500cc with Quick Disconnect, (1) Fenestrated Drape, (1) 1" x 3" CURITY Adhesive Bandage and (1) Lidocaine Drug Insert Sheet. HYPOGUARD INSUFLON® MULTI-INJECTION THERAPY AID

Insuflon® is a unique catheter system used for multiple daily injection therapy for insulin dependent people with diabetes. It allows multiple subcutaneous injections of insulin through the same port. It is comfortable, simple to use, and easy to take care of. Once inserted, the soft Teflon® catheter may remain in place for three days. Insuflon enables medication to be administered without repeated punctures of the skin, eliminating the pain and discomfort often associated with injections. Insuflon makes it easier for needle sensitive people to manage their diabetes.

EXEL STERILE SURGICAL BLADES

Made from premium quality Swiss carbon steel and British stainless steel. Computer controlled grinding, sharpening and polishing, ensures consistently smooth incision properties. Sterilized by GAMMA radiation 2.5m-RADS. A Vapor Corrosion Inhibitor (VCI) paper lining, leakage testing, and an aluminum foil peel pack help insure quality and integrity when ready to use. Each production lot is sampled and conforms to ISO 2859, inspection level (S4) AQL 1.0 & 2.5. Blade rigidity is tested to eliminate blade breakage. Conforms to ISO: 7740 (1995) and BS: 2982 (1986). Ultrasonically cleaned prior to packaging.

AARON 2250 DIGITAL ELECTROCAUTERY GENERATOR

Dedicated digital hardware instead of general purpose controller for processing data with parallel data processing, generating high data processing throughput. Easy-to-handle and covers the whole spectrum of electrocautery interventions. Monopolar and bipolar functions satisfy all surgical demands with maximum safety and a user-friendly interface. The digitally controlled CUT and COAG functions, able to measure tissue impedance in real time. Unsurpassed safety, instantly disables at the sound of trouble.

A2250 A2250 Digital Electrocautery Generator

AARON 3250™ DIGITAL ELECTROCAUTERY GENERATOR

Features Cut (300 watts), with Blend (200 watts adjustable in 10 Steps), Coagulation (Coagulation 120 watts, Fulguration 80 watts), and Bipolar (80 watts) modes. Ten Presets are available for storing Cut, Coagulation, and Bipolar power settings. Bovie has incorporated automatic safety systems into the Aaron 2250™ including self-test circuits, audible tones, discreet outputs, isolated circuitry, and Bovie NEM™ (neutral electrode monitoring).

A3250 Aaron 3250™ Digital Electrocautery Generator

AARON 800EU™ HIGH FREQUENCY DESICCATOR

Utilizes a large rotary dial for rapid and precise power control. Output is displayed numerically via an unobstructed easy-to-read LED. In addition, power may be adjusted in one-tenth increments in the often used under 10 watt range. Unlike other available units, high and low outputs have been combined into a single port. By incorporating the latest in chip technology and reducing the number of internal parts, less internal heat is generated, adding to the life of each instrument. The handpiece holds all standard 3/32" electrodes securely. When not in use, the handpiece rests conveniently in a holder specifically designed to reduce contact with potentially contaminated areas outside the sterile field. The handpiece is both autoclavable and cold sterilizable. The unit may be either wall-mounted or attached to a sturdy five-caster mobile stand.

AARON ELECTROSURGICAL GENERATOR

Five output settings: Cutting (120W), Blended Cutting (90W), Coagulating (80W), Fulgurating (40W) and Bipolar (30W) Modes. Easy-touch color-coded membrane pads located on the front panel. Rotary power-control dial. Post-procedure cleanup is simple because of the unit's nonabsorbent, stain-resistant, high-impact plastic case. All standard 3/32" disposable or reusable electrodes fit the handpiece. Autoclavable and cold sterilizable. Standard equipment includes the unit with power cord, reusable handpiece, five disposable active electrodes, reusable dispersive cord, five disposable dispersive electrodes, operator's manual, and wall-mount kit.

ETHICON ETHIBOND™ EXCEL POLYESTER SUTURES

A nonabsorbable, braided, sterile, surgical suture composed of poly (ethylene, terephthalate). It is prepared from fibers of high molecular weight, long-chain, linear polyesters having recurrent aromatic rings as an integral component. It's uniformly coated with polybutylate or poly. The highly adherent coating is a relatively nonreactive nonabsorbable compound which acts as a lubricant to mechanically improve the physical properties of the uncoated suture by improving handling qualities as contrasted to the braided, uncoated fiber. They are braided for optimal handling properties, and for good visibility in the surgical field and are dyed green.

ETHICON MERSILENE™ POLYESTER FIBER SUTURES

Mersilene polyester fiber suture provides precise, consistent suture tension. They minimize breakage and virtually eliminate the need to remove irritating suture fragments post-operatively. Frequent uses: general soft tissue approximation and/or ligation, including use in cardiovascular, ophthalmic and neurological procedures.

ETHICON NUROLON™ BRAIDED NYLON SUTURES

C553D	Taper Point Suture, Size 3-0, Black Braided, 8-18", Needle RB-1, 1/2 Circle, Safety Organizer Tray, 1 dz/bx
C584D	Taper Point Suture, Size 4-0, Black Braided, 8-18", Needle TF, 1/2 Circle, Safety Organizer Tray, 1 dz/bx

ETHICON PDS II™ (POLYDIOXANONE) SUTURES

For the longest lasting absorbable monofilament wound support with outstanding pliability. Indicated for use in all types of soft tissue approximation, including use in pediatric cardiovascular tissue where growth is expected to occur, and ophthalmic surger. Not indicated in adult cardiovascular tissue, microsurgery, or neural tissue.

**ETHICON SURGICAL GUT SUTURE - CHROMIC**

An absorbable, sterile surgical suture composed of purified connective tissue (mostly collagen) derived from either the serosal layer of beef (bovine) or the submucosal fibrous layer of sheep (ovine) intestines. Surgical gut sutures are available in plain or chromic. Chromic gut is processed to provide greater resistance to absorption. Surgical gut is packaged in tubing fluid. Blue dyed chromic gut suture is also available. Surgical gut suture meets all requirements established by the U.S. Pharmacopeia (U.S.P) for absorbable surgical sutures.

Intelligent Woundcare!

DermaFilm

Hydrocolloid wound dressing. Maintains a moist wound environment. Superior conformability improves patient comfort. Impervious barrier to moisture, bacteria and contamination.

Comparable to :

- RepliCare
- Ultec
- DuoDerm

00239 4" x 4" HD
00259 4" x 4" Extra Thin
00279 6" x 7" Sacral
00229 2" x 2" thin w/border

DermaGinate

Calcium Alginate wound dressing conforms readily to wound bed creating a moist wound environment. Dressing will absorb up to 17 times its own weight. Will not stick to healing tissue.

Comparable to :

- Seasorb
- Algisite
- Kaltostat
- Carraginate

00270E 4" x 4"
00275E 12" Rope

DermaView

Low exudates transparent dressing conforms easily to awkward areas. Reduces risk of infection from airborne bacteria, urine and feces. Permits evaluation of wound progress.

Comparable to :

- OpSite
- Tegaderm
- Bioclusive

00251 4" x 4"
00241 2.2" x 2.6"

Advancing Healthcare Worker Safety

with BD safety-engineered products

BD offers the most complete line of safety-engineered products. BD's leadership role in the effort to protect healthcare workers from accidental injuries is showing highly positive results. According to the EPINet™ computerized surveillance program, the needlestick injury rate to nurses in U.S. fell 51% overall.¹

- NEW! BD Vacutainer® Push Button Blood Collection Set** offers split-second protection and in-vein activation for improved safety.
- NEW! BD Integra™ Retracting Syringe**, now available in 1 mL size, offers low waste space for reduced medication waste and costs.
- NEW! BD Bard-Parker™ Protected Surgical Blades and Handles** minimize risk of surgical blade injuries without compromise to procedure, handling, technique, or reliability.

ETHICON VICRYL™ PLUS COATED ANTIBACTERIAL SUTURES

The first and only suture to inhibit bacterial colonization of the suture. Contains Irgacare MP, a pure form of Triclosan - a proven, broad-spectrum antibacterial used effectively in consumer products for more than 30 years. Creates a zone of inhibition, which prevents bacterial colonization by the pathogens that most often cause surgical site infections. For use in general soft tissue approximation and/or ligation, except for ophthalmic, cardiovascular and neurological tissues. This suture, being absorbable, should not be used where extended approximation of tissue under stress is required. Should not be used in patients with known allergic reactions to Irgacare MP (triclosan).

LOOK POLYSYN FA™ FAST ABSORBING POLYGLYCOLIC SUTURES

Designed for short-term (7-10 days), low-stress wound support. Sterile, undyed, braided polyglycolic acid sutures are non-antigenic and non-pyrogenic for little tissue reaction. Suture diameter is matched to diameter of quality, precision Sharpoint needles for smooth penetration and less tissue trauma. High initial strength, 50% strength at 5 days, 0% at 14 days. Essentially absorbed at 42 days.

LOOK SHARPOINT DERMAGLIDE™ COSMETIC SURGERY SUTURES

The ultra-sharp, non-glare needle and closely matched-diameter suture were designed specifically to minimize trauma, suture line bleeding and resulting scarring. Made of specialty stainless steel wire, the needle is precisely tempered for hardness and tensile strength so it holds its fine edge pass after pass and glides exactly as guided. The tip is a long-taper, precision-faceted diamond shape. Its four ultra sharp edges are formed using a grindless, proprietary process. Designed to easily penetrate highly elastic dermal tissue without tenting, drag, or unwanted cutting of the periphery. Non-glare finish make it easier to see exactly where it is placed in the tissue. Unique swage channel needle/suture union assures the suture remains attached until it is ready to cut. Transparent packaging and large legible type speeds proper identification. Extra-long pull-tabs on the package simplify gloved-handling. The package's carrier pad provides maximum needle-tip protection and prevents suture tangling. It also offers a convenient needle park during surgery.
