# Total Focus on Orthopedic Softgoods

## Surround® Patella Strap

Helps relieve anterior knee pain caused by patellar tendonitis, chondromalacia and Osgood Schlatter by applying pressure to the patella tendon. Soft, latex free nylon/foam laminate with contact closures. A unique cylindrical Floam™ bladder may be adjusted for added compression on patella tendon. Patent Pending.

## Quick-Fit® Wrist

Cool, soft felt/brush nylon construction with a single one-pull design fits on a wide range of wrist sizes. Dorsal stay within adjustable stay pod can be moved proximal or distal for desired controlled range-of-motion.

## Nextep™ Contour Air Walker

Lightweight, durable, one-piece wrap-around shell, provides maximum immobilization and support following ligament and tendon repair, osteotomy, pinning procedures, stress fractures or post-operative bunion surgery. Unique design of circumferential shell also accommodates larger calf sizes. Low profile, cushioned rocker sole absorbs impact of heel strike to improve comfort during ambulation.

## IMAK Pil-O-Splint®

Designed to provide exceptional comfort and maximum pain relief during rest and sleep. Soft cotton lining allows skin to breathe. Two rigid plastic dorsal splints immobilize the hand, wrist and fingers in a neutral position. Palm rests on a tiny "pillow" for added comfort.

## CFT CPR LIFE MASK®

Engineered to reduce the risks of physical contact during mouth-to-mouth resuscitation. The unique, patented non-rebreathing valve is complete with the 3M Filtrete filter and distances the rescuer from the victim for continuous monitoring of conditions. Air flows from rescuer to victim, then from victim away from rescuer. The Adult Life Mask comes with our patented one-way valve, 3M Filtrete filter and mouthpiece packaged in a poly bag.

LM-500 Adult Mask w/one-way valve & 3M Filtrete™ Filter, 50/cs

## CFT CPR LIFE MASK® COMPACT BARRIER

The Compact Barrier is the most protection you can hold in your hands. This large soft vinyl barrier conforms easily to facial contours, is clear to monitor victim's condition and has a patented one-way valve with the 3M Filtrete filter and exhalation port to maximize safety between the rescuer and victim. A must for the trained rescuer and First Responder.

**DESERT ASSEMBLY OPTI-KLENS I EMERGENCY EYEWASH**

Chrome-plated, solid brass eyewash unit easily installs on any existing sink or basin faucet as a permanent eye wash fountain with unlimited water supply in an emergency, unlike portable models. In operation, unit mounts behind the spout, where it remains out of the way for every day use. In an emergency, it frees both hands to hold eyes open to the flow of water. Delivering more than twice the required water flow, it does so at a reasonable height. It will function properly with as little as 15 lbs. of water pressure. It is restricted to reduce high water pressure to a velocity low enough not to be injurious to the user. No plumbing required. Two of the most common adapters are packed with the unit. Other adapters are available from manufacturer. Meets ANSI Standard #Z358.1-1998 for an eyewash unit. The addition of the Eliminator Valve allows water temperature to be pre-set at the faucet and remain on. You now have a dedicated eyewash station with only cold water available. For sink use, the water flow is activated by the use of the push through plunger on the Eliminator Valve. Push the plunger to the opposite side for water flow.

**DESERT ASSEMBLY OPTI-KLENS II EMERGENCY FACE & EYEWASH**

Chrome-plated, solid brass face & eyewash unit is designed to fit most standard faucets as a permanent face wash & eyewash fountain with unlimited water supply in an emergency. In operation, unit mounts to the spout with two spray nozzles curving upwards. In an emergency, it frees both hands to hold eyes open to the flow of water. Delivering more than 3 gallons of water per minute, it does so at a reasonable height. No plumbing required. Two of the most common adapters are packed with the unit. Other adapters are available from manufacturer. Meets ANSI Standard #Z358.1-1998 for an eyewash unit. The addition of the Eliminator Valve allows water temperature to be pre-set at the faucet and remain on. You now have a dedicated face wash & eyewash station with only cold water available. For sink use, the water flow is activated by the use of the push through plunger on the Eliminator Valve. Push the plunger to the opposite side for water flow.

**DESERT ASSEMBLY OPTI-KLENS II LABORATORY FACE & EYEWASH**

Chrome-plated, solid brass face & eyewash unit is designed to fit laboratory gooseneck faucets as a permanent face wash & eyewash fountain with unlimited water supply in an emergency. In operation, unit mounts to the spout with two spray nozzles curving upwards with a 15 degree greater angle than the standard OK-II model. In an emergency, it frees both hands to hold eyes open to the flow of water. Delivering more than 3 gallons of water per minute, it does so at a reasonable height. No plumbing required. Two of the most common adapters are packed with the unit. Other adapters are available from manufacturer. Meets ANSI Standard #Z358.1-1998 for an eyewash unit. The addition of the Eliminator Valve allows water temperature to be pre-set at the faucet and remain on. You now have a dedicated face wash & eyewash station with only cold water available. For sink use, the water flow is activated by the use of the push through plunger on the Eliminator Valve. Push the plunger to the opposite side for water flow.

**DESERT ASSEMBLY OPTI-KLENS WALL MOUNTED EYEWASH**

Wall-Mounted Emergency Eyewash Fountain. This model meets the needs of facilities without close access to standard sinks where a face & eyewash station is required. This face & eyewash fountain provides all of the safety features and regulatory requirements of all Opti-Klens face & eyewash fountains, but gives the customer an alternative to sink-installed units.
